Professional Summary

Computer Science undergraduate passionate about Frontend Development with hands-on experience in responsive web applications and AI-powered solutions. Eager to contribute to scalable, user-focused software products.

Education

TJS College of Arts and Science

Bachelor of Science (B.Sc.) Computer Science with Artificial Intelligence

2024 – 2027

Puduvoyal, Tamil Nadu

Internships

MindCare – AI Stress Management | 1M1B Virtual Internship—Sustainability, Problem Solving

May 2026

- Developed MindCare, a student stress management project focused on promoting mental well-being and creating awareness around stress-related challenges.
- Researched student needs and explored technology-driven approaches to support stress management and emotional well-being.
- Collaborated in a virtual internship environment to design and present a socially impactful solution.

NeuroNote – AI Productivity Assistant | FACE Prep Summer Internship—AI, Productivity, Innovation

June 2026

- Built NeuroNote, an AI-powered second brain concept designed to organize, capture, and retrieve information efficiently.
- Applied problem-solving and development concepts to transform ideas into a practical AI-driven productivity solution.
- Strengthened technical, analytical, and collaboration skills through project-based internship experience.

Projects

AI-Powered Chatbot using OpenAI API | Python, OpenAI API, Environment Variables, CLI Application August 2025

- Developed an interactive command-line AI chatbot using Python by integrating the OpenAI Chat Completion API to generate dynamic, context-aware responses, while gaining hands-on experience in prompt structuring and real-time AI interaction workflows.
- Implemented secure API key management using environment variables (dotenv) and structured request-response handling to ensure reliable communication with the language model and stable runtime behavior.
- Designed a continuous conversational loop with graceful termination and robust exception handling to improve usability and prevent application crashes during API failures.

RailEase – Railway Ticket Booking Website | HTML, CSS, JavaScript — Frontend Web Application September 2025

- Designed and developed RailEase, a responsive railway ticket booking web application using semantic HTML, modern CSS, and JavaScript to simulate an end-to-end ticket reservation workflow.
- Built interactive user interfaces for train search, route selection, passenger detail entry, and booking confirmation by dynamically handling DOM events, user inputs, and client-side validation.
- Implemented responsive web design, form validation, event handling, DOM manipulation, and user-friendly interface design.

Certifications

Microsoft Applied Skills — Microsoft Learn

Cloud Computing Essentials — AWS Training Certification

Fundamental of Web Development — Naan Mudhalvan

English proficiency — Naan Mudhalvan

ReactJS — SkillUp

Skills

Programming Languages: Python, JavaScript, HTML5, CSS3

Frontend Development: React (Learning), Responsive Web Design, DOM Manipulation, REST API Integration

Developer Tools: Git, GitHub, VS Code, Chrome DevTools

Web Technologies: Responsive UI Design, Form Validation, JSON, Google Cloud Platform (Basics)

Leadership / Extracurricular

Team Leader, Smart India Hackathon (SIH) 2024: Led a team to analyze problem statements, develop technical solutions, and collaborate effectively within competitive hackathon timelines.

Organizer, Hack Verse 2025 (TJS College of Arts and Science): Designed Python debugging challenges and successfully coordinated an inter-college AI and programming event.
